-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on November 11, 2003, was filed and the after submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Daniele (6,733,056).

Art Unit: 3652

Daniele (6,733,056) discloses a scoop and method comprising a base (13) having an open end for receiving objects, a pair of sidewalls (14,16) attached to a side of the base and extending upward therefrom to enclose the base along the sides of the base, a grip (21) extending from an end opposite from open end of the base and enclosing that end of the base, the grip being attached to one of the pair of sidewalls on each side of the grip, the base, the grip and the pair of sidewalls defining a volumetric capacity for holding objects and transporting the objects with limited spillage. Daniele (6,733,056) contains all the structural elements as recited in the claims while the intended use (i.e. *to transport food*) is not patentably significant.

5. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by McMath (4,245,411).

McMath (4,245,411) discloses a scoop and method comprising a base (24,26) having an open end for receiving objects, a pair of sidewalls (20) attached to a side of the base and extending upward therefrom to enclose the base along the sides of the base, a grip (30) extending from an end opposite from open end of the base and enclosing that end of the base, the grip being attached to one of the pair of sidewalls on each side of the grip, the base, the grip and the pair of sidewalls defining a volumetric capacity for holding objects and transporting the objects with limited spillage. McMath (4,245,411) contains all the structural elements as recited in the claims while the intended use (i.e. *to transport food*) is not patentably significant.
